PROFESSIONAL SUMMARY

Data and AI graduate (B.Tech, Computer Science and Data Science, 2026) with hands-on experience in SQL, Python, machine learning, and deep learning, seeking AI Engineer, Data Scientist, and Data Analyst roles. Built KPI reports and streamlined reporting workflows at Reliance Jio. Developed an end-to-end churn prediction pipeline with SHAP and Power BI, and trained CNN models for lung and colon cancer detection with 90% test accuracy using TensorFlow and OpenCV. Projects showcased in an AI portfolio.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Matplotlib)
Machine Learning & AI: Scikit-learn, TensorFlow, Keras, Deep Learning, CNNs, Regression, Classification, Feature Engineering, Model Evaluation, Data Augmentation, SHAP (Explainable AI), OpenCV
Data Analysis & BI: SQL, Power BI, DAX, Excel (Pivot Tables, VLOOKUP), Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization, KPI Reporting
Databases: PostgreSQL
Tools: Git, GitHub, Jupyter Notebook, Streamlit

WORK EXPERIENCE

Full Stack Developer Intern (Academic Internship) | Codsoft — Aug 2025 – Sep 2025
- Created a responsive web-based calculator using HTML, CSS, and JavaScript to perform basic arithmetic and scientific calculations.
- Implemented JavaScript event handling to process user input and display calculation results.

IT Process and Data Analysis Intern | Reliance Jio — Apr 2024 – Jun 2024
- Analyzed a 5,000-row, 20-column customer dataset using SQL, Excel (Pivot Tables, VLOOKUP), and Power BI to build reports tracking 5 KPIs and identify operational trends.
- Delivered Power BI reports used by the company to monitor customer churn, identifying a 65% churn rate and supporting data-driven process optimization decisions.
- Redesigned a recurring reporting workflow using Excel and SQL, cutting turnaround time from 3 hours to 45 minutes (75% reduction) and reducing manual effort.

PROJECTS

AI Customer Churn Prediction | Python, Scikit-learn, SHAP, SQL, Power BI, DAX, Pandas — May 2026 – Present
Link
- Built an end-to-end customer churn prediction pipeline in Python on the Telco dataset (7,043 customers, 26.54% churn rate), covering data cleaning, EDA, feature engineering, model training, and evaluation using Scikit-learn.
- Applied SHAP explainability to interpret model predictions and identify key churn drivers; month-to-month contracts (42.7% churn vs 2.8% for two-year) and fiber optic service (41.9% vs 19.0% for DSL) emerged as the highest-risk segments.
- Designed a 3-page interactive Power BI dashboard (Executive Overview, Customer Segmentation, AI Customer Risk Analysis) with DAX measures to track churn rate, retention, and customer-level churn probabilities, flagging 2,317 high-risk customers.

Lung and Colon Cancer Detection (B.Tech Major Project) | Python, TensorFlow, Keras, CNN, Streamlit — Apr 2026
Link
- Trained CNN-based deep learning models in TensorFlow/Keras to classify lung and colon cancer from medical image scans sourced from Kaggle datasets, achieving 90% accuracy on the test set.
- Engineered a modular training pipeline with data augmentation and callbacks (EarlyStopping, ReduceLROnPlateau, ModelCheckpoint, TensorBoard), and evaluated the models using accuracy, precision, recall, F1-score, and confusion matrices.
- Deployed an interactive Streamlit web application for real-time image upload and prediction with confidence scores.

EDUCATION

B.Tech, Computer Science and Data Science | ABES Engineering College, Ghaziabad — Jun 2026
CGPA: 7.56 / 10

CERTIFICATIONS

AI Professional | Google & Coursera — Jun 2026
AI and Machine Learning Engineer | Reliance Foundation — Apr 2026
Cloud Computing | AWS Academy — Apr 2024
