PROFESSIONAL SUMMARY

Data and AI graduate (B.Tech, Computer Science and Data Science, 2026) with hands-on experience in SQL, Python, Power BI, and machine learning, seeking Data Analyst, Data Scientist, and AI/ML Engineer roles. Reduced reporting turnaround by 75% and built KPI reports during a Reliance Jio internship. Delivered a customer churn prediction project (Logistic Regression, 84.2% ROC-AUC) with SQL analysis, SHAP explainability, and a Power BI risk dashboard, and trained CNN models for lung and colon cancer detection (90% test accuracy) deployed as a Streamlit app.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn)

Data Analysis & BI: SQL (Joins, Aggregations, CTEs, Window Functions), Power BI, DAX, Excel (Pivot Tables, VLOOKUP), Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization, KPI Reporting

Machine Learning & AI: Scikit-learn, TensorFlow, Keras, Deep Learning, CNN, Regression, Classification, Feature Engineering, Model Evaluation, Data Augmentation, SHAP (Explainable AI), OpenCV

Databases: SQLite, PostgreSQL

Tools: Git, GitHub, Jupyter Notebook, Streamlit

PROJECTS

AI Customer Churn Prediction May 2026 - Present

Python, SQL (SQLite), Scikit-learn, SHAP, Power BI, DAX, Pandas |

- Built an end-to-end churn prediction pipeline in Python on the Telco dataset (7,043 customers, 26.54% churn), covering data cleaning, EDA, feature engineering, model training, and evaluation.
- Compared classification models in Scikit-learn; the best performer, Logistic Regression, achieved 84.2% ROC-AUC and 60.4% recall on a held-out test set.
- Wrote SQL queries in SQLite using CTEs, window functions, and CASE WHEN to segment customers: month-to-month contracts showed 42.7% churn vs 2.8% for two-year contracts, and rule-based risk tiers separated high-risk customers (69.2%) from low-risk (6.9%).
- Applied SHAP to explain key churn drivers and designed a 3-page Power BI dashboard (Executive Overview, Customer Segmentation, AI Customer Risk Analysis) with DAX measures for churn rate, retention, and customer-level churn probability.

Lung & Colon Cancer Detection (B.Tech Major Project) Apr 2026

Python, TensorFlow, Keras, CNN, Streamlit |

- Trained CNN models in TensorFlow/Keras to classify lung and colon cancer from medical image scans (Kaggle datasets), achieving 90% accuracy on the test set.
- Engineered a modular training pipeline with data augmentation and callbacks (EarlyStopping, ReduceLROnPlateau, ModelCheckpoint, TensorBoard); evaluated with accuracy, precision, recall, F1-score, and confusion matrices.
- Deployed an interactive Streamlit web app for real-time image upload and prediction with confidence scores.

WORK EXPERIENCE

Full Stack Developer Intern (Academic) | Codsoft Aug 2025 - Sep 2025

- Created a responsive web calculator in HTML, CSS, and JavaScript supporting both basic arithmetic and scientific calculations.
- Implemented JavaScript event handling to process user input and display calculation results.

IT Process and Data Analysis Intern | Reliance Jio Apr 2024 - Jun 2024

- Redesigned a recurring reporting workflow using Excel and SQL, cutting turnaround time from 3 hours to 45 minutes (75% reduction) and reducing manual effort.
- Delivered Power BI reports tracking 5 KPIs that the company used to monitor customer attrition, identifying a 65% churn rate and supporting data-driven process improvements.
- Analyzed a 5,000-row, 20-column customer dataset using SQL, Excel (Pivot Tables, VLOOKUP), and Power BI to identify operational trends.

EDUCATION

B.Tech, Computer Science and Data Science | ABES Engineering College, Ghaziabad Jun 2026

CGPA: 7.56 / 10

CERTIFICATIONS

AI Professional | Google & Coursera Jun 2026

AI and Machine Learning Engineer | Reliance Foundation Apr 2026

Cloud Computing | AWS Academy Apr 2024
