YASH RAGHAV

Ghaziabad, Uttar Pradesh | 8882107352 | yashr092003@gmail.com | github.com/yashraghav-dev | linkedin.com/in/yashraghav

PROFESSIONAL SUMMARY

Data & Analytics undergraduate (B.Tech, Computer Science and Data Science, 2026) with hands-on experience turning raw business data into actionable insights using SQL, Python, and Power BI. Delivered KPI reporting and process analysis during a data analysis internship at Reliance Jio, and currently building end-to-end analytics projects spanning PostgreSQL database design, EDA, and stakeholder-facing dashboards. Skilled at moving from raw data to clear, decision-ready visualizations.

TECHNICAL SKILLS

Data Analysis & BI: SQL, Power BI, Excel (Pivot Tables, Text-to-Columns, VLOOKUP), Python (Pandas, NumPy, Matplotlib)

Databases: PostgreSQL (pgAdmin, schema design, \copy / COPY, query optimization), MySQL

Programming: Python, Java, C

Machine Learning: Scikit-learn, TensorFlow, Regression, Classification, CNNs

Tools: Git, GitHub, Jupyter Notebook, VS Code

EXPERIENCE

IT Process and Data Analysis Intern | Reliance Jio *Apr 2024 – Jun 2024*

- Analyzed business datasets using SQL and Excel to build KPI reports, surfacing operational trends that informed process-optimization decisions.
- Redesigned a recurring reporting workflow using Excel and SQL, reducing manual effort and improving reporting turnaround.

Full Stack Developer Intern | Codsoft *Aug 2025 – Sep 2025*

- Built and shipped responsive web applications using HTML, CSS, JavaScript, and Bootstrap, improving cross-browser compatibility and page load performance.
- Collaborated in a remote, self-directed sprint cycle to deliver front-end features across multiple project pages.

PROJECTS

Customer Behavior Analysis | SQL, Power BI, Excel, Python *May 2026 – Present*

- Cleaned and analyzed a customer transactions dataset using Python and SQL, running exploratory data analysis and customer segmentation to surface retention opportunities.
- Profiled high-value customer segments and purchasing patterns, translating findings into a targeted retention strategy.
- Designed an interactive Power BI dashboard tracking revenue, churn risk, and segment share for stakeholder review.

Employee Database System | PostgreSQL, pgAdmin, SQL *2026*

- Designed and rebuilt a normalized employee database schema in PostgreSQL, applying modern constraints, data types, and indexing best practices.
- Diagnosed and resolved server-side bulk-import limitations by implementing client-side \copy via the psql terminal, enabling reliable CSV ingestion.
- Standardized inconsistent date formats across 200 employee records using Excel's Text to Columns wizard prior to import, eliminating load errors.

Lung Cancer Detection | Python, TensorFlow, CNN, OpenCV *Apr 2026*

- Developed a CNN-based classification model for lung cancer detection on CT scan imaging data, achieving 90% accuracy on the test set.
- Improved model performance through data augmentation, transfer learning, and hyperparameter tuning; applied image preprocessing and feature extraction using TensorFlow and OpenCV.

EDUCATION

B.Tech, Computer Science and Data Science | ABES Engineering College, Ghaziabad *Jun 2026*
GPA: 7.3 / 10

ISC (Grade 12) | St. Joseph's Academy, Ghaziabad *May 2022*
GPA: 8.7 / 10

ICSE (Grade 10) | St. Joseph's Academy, Ghaziabad *May 2020*
GPA: 8.5 / 10

CERTIFICATIONS

- AI Professional — Google & Coursera (Jun 2026)
- AI and Machine Learning Engineer — Reliance Foundation (Apr 2026)
- Cloud Computing — AWS Academy (Apr 2024)
