PROFESSIONAL SUMMARY

Data and AI graduate (B.Tech, Computer Science and Data Science, 2026) with hands-on experience across the full data workflow, from SQL and Python analysis to machine learning and deep learning. Built KPI reports and streamlined reporting workflows during a data analysis internship at Reliance Jio, delivered customer segmentation and Power BI dashboards for stakeholder review, and developed a CNN-based lung cancer detection model with 90% test accuracy using TensorFlow and OpenCV. Skilled in SQL, PostgreSQL, Pandas, Scikit-learn, and Power BI, with an AI portfolio showcasing my work.

TECHNICAL SKILLS

Data Analysis & BI: SQL, Power BI, Excel (Pivot Tables, Text-to-Columns, VLOOKUP), Python (Pandas, NumPy, Matplotlib)
Databases: PostgreSQL (pgAdmin, schema design, \copy / COPY, query optimization), MySQL
Programming: Python
Machine Learning: Scikit-learn, TensorFlow, Regression, Classification, CNNs
Tools: Git, GitHub, Jupyter Notebook, VS Code

EXPERIENCE

Full Stack Developer Intern | Codsoft *Aug 2025 – Sep 2025*

- Built and deployed responsive web applications using HTML, CSS, JavaScript, and Bootstrap, improving cross-browser compatibility and page load performance.
- Collaborated in a remote, self-directed sprint cycle to deliver front-end features across multiple project pages.

IT Process and Data Analysis Intern | Reliance Jio *Apr 2024 – Jun 2024*

- Analyzed business datasets using SQL and Excel (Pivot Tables, VLOOKUP) to develop KPI reports and identify operational trends, supporting data-driven process optimization decisions.
- Redesigned a recurring reporting workflow using Excel and SQL, reducing manual effort and improving reporting turnaround time.

PROJECTS

AI Customer Churn Prediction | Python, Scikit-learn, SHAP, SQL, Power BI, DAX, Pandas *May 2026 – Present*
Link: 🔗

- Built an end-to-end customer churn prediction pipeline in Python on the Telco dataset (7,043 customers, 26.54% churn rate), covering data cleaning, EDA, feature engineering, model training, and evaluation using Scikit-learn.
- Applied SHAP explainability to interpret model predictions and identify key churn drivers, finding higher churn among month-to-month contract and fiber optic customers.
- Designed a 3-page interactive Power BI dashboard (Executive Overview, Customer Segmentation, AI Customer Risk Analysis) with DAX measures to track churn rate, retention, high-risk segments, and customer-level churn probabilities.

Lung and Colon Cancer Detection (B.Tech Major Project) | Python, TensorFlow, Keras, CNN, Streamlit *Apr 2026*
Link: 🔗

- Trained CNN-based deep learning models in TensorFlow/Keras to classify lung and colon cancer from medical image scans, achieving 90% accuracy on the test set.
- Engineered a modular training pipeline with data augmentation and callbacks (EarlyStopping, ReduceLROnPlateau, ModelCheckpoint, TensorBoard), and evaluated models using accuracy, precision, recall, F1-score, and confusion matrices.
- Deployed an interactive Streamlit web application for real-time image upload and prediction with confidence scores.

EDUCATION

B.Tech, Computer Science and Data Science | ABES Engineering College, Ghaziabad *Jun 2026*
GPA: 7.3 / 10

CERTIFICATIONS

AI Professional | Google & Coursera *Jun 2026*

AI and Machine Learning Engineer | Reliance Foundation *Apr 2026*

Cloud Computing | AWS Academy *Apr 2024*
